DATE: Thursday, 16th April, 2009 **TIME:** 9:30 am

The Ministry of the Environment and Rural and Marine Affairs has organised an International Conference to mark the occasion of the publication of the 2007 data in the Spanish Register of Emissions and Pollutant Sources, PRTR-España, on the Internet. This is the first PRTR reference year, and the seventh since the Spanish register began in 2001.

This conference is given added interest due to its international aspect with which the Ministry wishes to give the data the maximum publicity, not only at a national level. For this reason there will be renowned international experts who will present their experiences and the state of the art regarding the implementation of PRTR registers in an international framework (PRTR Protocol from the Aarhus Convention) European framework (E-PRTR Register) and developed country framework (OECD). The conference will be completed with the point of view of the Autonomous Regions and NGO's.

If you are interested in attending the Conference, please find the programme attached. Given that **there is a limited capacity it is essential that attendance is confirmed either by:**
