MAP SEARCH USER'S GUIDE

User's Guides to search public information on PRTR-Spain
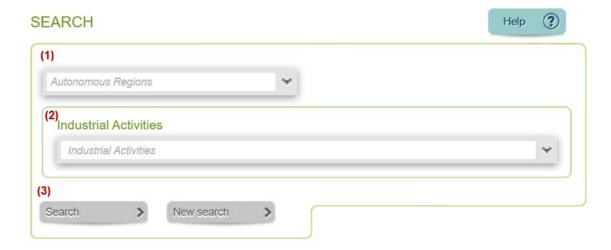

PRTR
España

What information can you consult here?

With this search you can use a Google map to find the location of industrial sites according to the following search criteria.

(1) **Autonomous Regions**. Allows the user to filter by facilities that by geographical region.

(2) **Activities**. It allows us to filter facilities according to the industrial activities included in the PRTR-Spain Register, which are described in Annex 1 of Royal Decree 508/2007 and in its subsequent amendment in Annex 5 of Royal Decree 815/2013.

As a **result** you will have a map of Spain with the facilities which have public information, at least, for one report year (since 2001) and with the selected criteria. If you "click" on a facility in the map you will have the information of its name and the access to its facility template.

The Geodesic Reference System used in the public information of PRTR-España, WGS84 (World Geodesic Datum, 1984), is completely equivalent with official ones adopted in Spain by Royal Decree 1071/2007: ETRS89 (European Terrestrial Reference System 1989) and REGCAN 95 for Canary Island).

(5) **Useful information:**

Buscar >	Don't forget to press the search button when you have finished your selection.
Nueva Búsqueda >	This button deletes the previous selection and allows you to make a new one.
